

For installation instructions, see <https://github.com/Line5/messup/wiki>.
Installation

- download and unpack <https://github.com/Line5/messup/archive/master.zip>
- edit the file `src/messup/config.php`:

- Add at least one agent
- change the email address
- change the name

- copy the messup directory including its contents to the public root directory of your webserver.
- ensure that the php file is able to create a tmp folder within the messup directory.

- include the following code to the header of your website, after embedding jquery: `<script src="/messup/messup.js" type="text/javascript"></script>`

Detailed information and Windows Client Download available at: <https://code.google.com/p/messupclientwin/>
